

# INTRODUCTION OF VISITING ACTIVITIES

**Visiting itinerary: June 17, 2023**

14:00~14:40 NYCU Laser System Research Center  
(Medical Laser System/Personal Healthcare)

15:10~16:30 Taiwan Space Agency(TASA)

## Satellite Integration & Testing Building

We will visit the places where various functional tests and space environment simulation tests are carried out on the ground. Building these places ensure that the satellite can be launched and tested in the harsh environment of space.

## Satellite Operations Control Center

The control center is set up to command satellites and satellite tracking. Through this visit, you can learn how to operate the satellite and see where the staff work place.

## FORMOSAT

Through this opportunity, we will take you to have a close look at various models of rockets, satellites and astronauts.
